

Product information

G Data ClientSecurity Enterprise

Install high-end, all-round protection on your corporate network with 100% centrally controlled administration for mobile and fixed clients as well as effective spam and phishing protection. G Data ClientSecurity Enterprise works without any loss of performance while still offering an award-winning client firewall and extremely secure, client/server based test-winning virus protection. All of which comes with intuitive operation that's really child's play.

Award-winning technology

- Improved DoubleScan technology for optimum virus detection
- Self-learning fingerprinting and whitelisting ensures no loss of PC performance
- The latest methods for detecting unknown viruses (heuristics, cloud security)

G Data ManagementServer

- Installation, scans, updates, settings and reports remotely controlled on the network (LAN/WAN) via TCP/IP
- Remote administration of all PCs / Web interface
- Cascading and disaster protection for server software
- Restoration of older signature statuses (rollback)

G Data AntiVirus Client

- Client protection runs in the background, "invisible" to users
- E-mail virus blocker for Outlook, POP3 and IMAP
- Fully integrated Linux clients

G Data Firewall Client

- New client firewall
- 100 % central administration
- Setup in just a few minutes
- Autopilot or central rule sets
- Simple setting of rules via dialogue, assistant or from reports
- Listing of blocked applications
- Optional offsite-configuration for notebooks

G Data AntiSpam Client

- Client-side spam OutbreakShield
- Multiple, award-winning spam real-time protection

G Data MailSecurity

- Virus and spam filters as mail-server independent gateway solution (SMTP / POP3)
- For any mail server such as Exchange, Notes etc.

G Data PremiumSupport

- Hourly virus signature updates
- Free software updates and version upgrades
- Advice by telephone and email, 24/7 all year round
